PROFESSIONAL PROFILE

Motivated and detail-oriented Computer Systems Engineering graduate with a specialization in Networks and Systems. Passionate about full-stack web development and network infrastructure, with hands-on experience building scalable MERN stack applications and deploying network supervision tools. Eager to contribute technical skills in a dynamic, growth-oriented environment.

EDUCATION

GOMYCODE — Full-Stack Web Development Bootcamp (MERN Stack) April 2025

Full-stack development with MongoDB, Express, React, Node.js • Version control with Git & GitHub

Faculté des Sciences de Sfax — B.Sc. in Computer Systems Engineering June 2024

Specialization: Networks & Systems • Agile methodologies, OOP, computer architecture, networking

PROFESSIONAL EXPERIENCE

Network Supervision & Audit Intern — Groupe Hammami (SCPS) 2023

IT Systems Department

- Designed and deployed a full network supervision system using Nagios and Grafana, providing real-time visibility into infrastructure health and performance metrics.
- Automated supervision tasks by writing custom shell scripts tailored to the company's specific infrastructure needs, reducing manual monitoring effort significantly.
- Strengthened expertise in Linux system administration, network performance analysis, and proactive infrastructure monitoring and alerting.
- Collaborated with the IT team to document network topology and define escalation procedures for detected anomalies.

ACADEMIC PROJECTS

Network Supervision System 2023

- Designed a complete network equipment supervision and audit solution, covering routers, switches, and servers.
- Built performance monitoring dashboards and anomaly detection mechanisms to proactively identify infrastructure issues.
- Integrated alerting pipelines to notify administrators of threshold breaches in real time.

Full-Stack LMS Platform (MERN Stack) 2025

- Architected and developed a full Learning Management System (LMS) enabling instructors to create and publish online courses with rich media content.
- Implemented student enrollment, progress tracking, and secure authentication using Clerk for identity management.
- Integrated Stripe payment gateway for seamless and secure online transactions.
- Built with the complete MERN stack: MongoDB, Express.js, React.js, and Node.js, following REST API design principles.

TECHNICAL SKILLS

Programming Languages: JavaScript (Proficient) · Python (Proficient) · C · C++ · Java (Familiar)

Web Development: React.js · Node.js · Express.js · REST APIs · HTML5 · CSS3 · Tailwind CSS · Bootstrap

Databases: MongoDB · Basic SQL

DevOps & Tools: Git · GitHub · Linux (Ubuntu/CentOS) · Nagios · Grafana · VS Code

Networking: TCP/IP · Network monitoring · Infrastructure audit · Routing & Switching basics

Methodologies: Agile / Scrum · OOP · MVC Architecture

CERTIFICATIONS

Legacy Responsive Web Design V8 · freeCodeCamp

Legacy JavaScript Algorithms and Data Structures V7 · freeCodeCamp

Postman API Fundamentals Student Expert · Postman

LANGUAGES

French: Native **English:** Professional (B2) **German:** Upper Intermediate (B2 – in progress)

INTERESTS & ACTIVITIES

Chess (competitive player — sharpens strategic and analytical thinking) · Fitness & strength training · Open-source development · Following trends in AI and cloud technologies
